

# BLACKSHAW GARDEN SERVICES

Welcome to Blackshaw Garden Services.

We are a small friendly family company offering 3 services to clients: garden design, construction and also garden maintenance services for any garden.

Based in Blackshaw Head, high above Hebden Bridge in the South Pennines we are able to provide our maintenance services to Calderdale and East Lancashire and our design and construction services are available further afield.

## DESIGN

From large garden projects down to small neglected corners, I am happy to help with any sized project. You can start from scratch or may just want to tweak your existing garden to get more from it or to reduce maintenance. I consider a garden to be just like a room inside the house; it has a function and provides an important space for you to appreciate in whatever way you want. I can help you get the most from your outside spaces whatever size they are. I use 3-D CAD (computer aided design) software as well as hand drawings so you can see how your garden will look, and you can even take a virtual walk through it before the first turf is turned.

Above: A pre project view of a section of garden, screen grab from 3-D walkthrough of garden, and finally the finished section of garden.

## CONSTRUCTION

If you wish, we can turn your garden plans into a reality, whether it is from a design we have worked on together or your own plans.

Carrying out the work ourselves can also keep costs down. If you choose this service we will provide an estimate of labour and materials costs with the design. The advantage of following a design through construction is that we already know where we are heading with the project, you will have the advantage of having the designer on site all the time eliminating the cost and potential delays of relying on project management by a separate designer, and if you want to get involved you can join in and do your own planting from a planting scheme. It also means that it is easier to modify and fine tune ideas, if desired, throughout the construction process. Wherever possible we use sustainable products, local suppliers and materials to minimize our environmental impact.

This small project in Mytholmroyd uses recycled plastic for both the weed barrier layer and edging for a gravelled area.

## MAINTENANCE

There a wide range of reasons for requesting our services for maintaining your garden.

Is your garden in need of a serious one off spring/autumn cleanup and the job just looks too big to want to do yourself?

Your garden may be becoming more of a chore than a place of enjoyment, or job commitments/health mean you are struggling to maintain it yourself. Why not let us regularly maintain your garden so you can spend more time enjoying it. You may also wish to consider some small tweaks to the garden to make it easier to maintain – see our design and construction pages.

Selling your house? Your garden could be the first impression prospective buyers get of your property. We can make sure visitors get a good first impression.

We can offer one off cleanups through to regular maintenance at intervals of your choice. [Contact us](#) with your requirements and we can sort something out. We will bring all the tools for the job and remove the garden waste after if you don't want it for compost

**CONTACT** If you live locally just drop in and chat but more formal means of contact are...
